TURMERIC

India is a major producer of Turmeric. turmeric is major part of Ayurvedic Medicine. Turmeric Finger is highly admired for its medical value, long shelf life , purity and Quality. Turmeric has also several health benefits likes skin problems and also quickly healing wounds.

100% Natural: No additives, preservatives, or artificial colours. Pure, natural spices.

Cumin is a flowering plant in the family Apiaceae, native to the Irano-Turanian Region. Its seeds – each one contained within a fruit, which is dried – are used in the cuisines of many cultures in both whole and ground form.

CARDAMOM

It is a spice made from the seeds of several plants in the genera Elettaria and Amomum in the family Zingiberaceae.[3] Both genera are native to the Indian subcontinent and Indonesia. They are recognized by their small seed pods: triangular in cross-section and spindle-shaped, with a thin, papery outer shell and small, black seeds

CORIANDER

Coriander is a fundamental spice in Indian and Middle Eastern cuisine, made by grinding dried seeds of the Coriandrum sativum plant. It is a light brown-green powder with a mild, earthy, and slightly citrusy flavor, acting as a key thickening agent and flavor base for curries, soups, and marinades

RED CHILLI

India is the largest consumer and producer of Red Chilli.are characterized by their ability to give a dark red colour to food and add flavour, while not allowing the food to become too pungent or spicy. They are harvested during winter.

ASAFOETIDA

As a culinary ingredient, asafoetida is primarily used in Indian and Middle Eastern cuisines, where it is employed to complement or substitute for alliaceous ingredients such as garlic and onion. Its use in the West has historically been limited, largely because of its odour, although it is included in certain products such as Worcestershire sauce. Beyond food, asafoetida has also been used in perfumery, mainly as a fixative, and in some agricultural contexts as a plant protection product , including applications as a natural pesticide.

FENUGREEK

It is an annual plant in the family Fabaceae, with leaves consisting of three small obovate to oblong leaflets. It is cultivated worldwide as a semiarid crop. Its leaves and seeds are common ingredients in dishes from the Indian subcontinent, and have been used as a culinary ingredient since ancient times. Its use as a food ingredient in small quantities is safe.
